

Ultra Soil Conditioner™

A soil additive specifically designed to balance water, nutrients and oxygen to convert poor soil into a loose, rich-growing medium. Enhances root growth for flowers, vegetables, trees, shrubs, container planters & hanging baskets. Use **Ultra Soil Conditioner™** with all types of problem soils, including clay soil, sandy soil, potting soil and container soils.

- *Breaks up heavy clay*
- *Holds water and nutrients without degrading*
- *Retains moisture in the root zone*
- *Increases drainage in most soils*
- *Can be used as a growing medium for aquatic plants in garden ponds*
- *Available in a 40 lb. bag*

HOW TO USE IN VEGETABLE & FLOWER BEDS

Pour and spread **Ultra Soil Conditioner™** to approximately 1" on top of soil. Shovel or rototill **Ultra Soil Conditioner™** into soil to a depth of 5". Plant as directed and water thoroughly. For row/ border plantings use one 40 lbs. per 15 square feet.

HOW TO USE IN CONTAINERS & HANGING BASKETS

Pour **Ultra Soil Conditioner™** 1" deep into bottom of pot. Mix one part **Ultra Soil Conditioner™** with three parts potting soil. Place plant in pot. Fill with mixture and water thoroughly.

HOW TO USE IN WATER GARDENS & PONDS

Pour **Ultra Soil Conditioner™** into a bucket and soak with water. Cover pot holes with screen or weed barrier. Place plant in pot and cover with wet **Ultra Soil Conditioner™**. Cover top of **Ultra Soil Conditioner™** with small stones. Sink pot slowly into pond.

HOW TO USE WITH TREES & SHRUBS

Dig hole to appropriate specifications. Pour **Ultra Soil Conditioner™** 1" deep into bottom of hole. Mix one part **Ultra Soil Conditioner™** with four parts soil. Plant as directed. Backfill with mixture and water thoroughly.

ESTABLISHED LAWNS

In the spring and fall, core aerify your lawn in a crisscrossing pattern (ask your garden center consultant about core aerifying). Using a drop spreader add **Ultra Soil Conditioner™** at a rate of 6 bags per 1,000 square feet. Rake **Ultra Soil Conditioner™** into holes and water thoroughly.

NEW LAWNS

Rototill or cultivate soil to a 5" depth and incorporate **Ultra Soil Conditioner™** at a rate of 40 lbs. per 1,000 square feet. Level soil area then plant grass seed accordingly. Water thoroughly.
